

Prospero™

An application suite for end-users and system administrators.

Prospero simplifies the management of your EDI and other e-commerce activities. Users are able to track transaction status and document history, while system administrators will enjoy the simple set-up and low maintenance features of Prospero. With an easy-to-use interface and browser-based deployment, everyone that needs e-commerce information will find it up-to-date and readily available.

A WINDOW ON YOUR E-COMMERCE WORLD

- Transaction status
- Delivery confirmations
- Document archive
- System settings

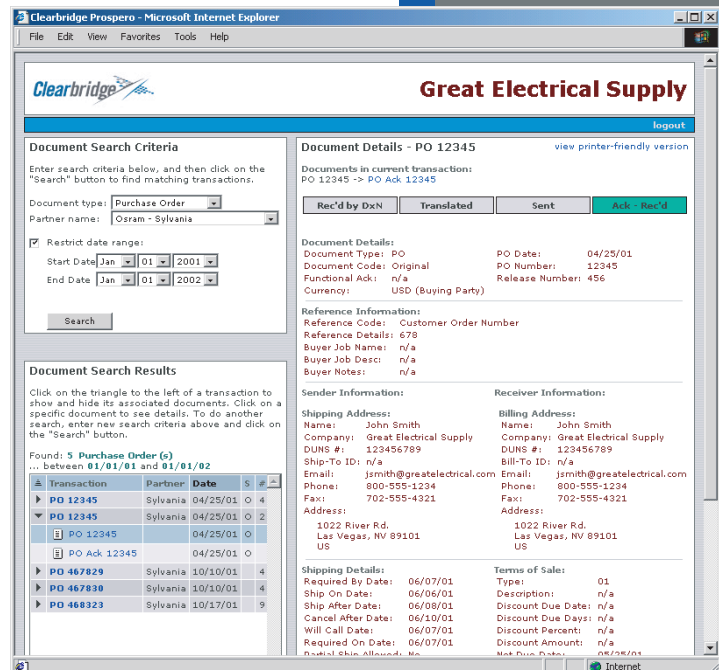

Critical Information at Your Fingertips

Commerce Manager allows users to rapidly locate documents transmitted or received via the Clearbridge network.

- Search for documents by type, trade partner, and date of transmission
- Locate a specific document and its associated document trail
- Quickly view complete document details including transmission status

Rebate Manager facilitates the rebate claims process.

- Manage the rebate claims process electronically from start to finish
- Quickly reconcile claims submitted with claims accepted
- Easily generate claim exception reports

(Prospero Commerce Manager)

From An Easy-to-Manage Commerce Platform

Communications Manager connects your business software systems with the Clearbridge network.

- Secure VPN communications
- Document caching and transaction roll-back
- Auto back-up and rebuild capability
- Transaction status monitoring

User Manager helps administrators manage Prospero user accounts.

- Create, modify, disable, and delete user accounts
